

- Stabilizes fuel
- Cleans entire fuel system
- Removes carbon deposits
- Reduces emissions and soot

ALGAE-X[®] Fuel Catalyst is a powerful full spectrum additive and tank cleaning agent. It provides superior fuel quality for engines and storage tanks, lowering operating cost, maintenance and downtime.

The **Fuel Catalysts** unique formula eliminates the build up of sludge, improves combustion, adds lubricity, and reduces harmful emissions.

AFC-705 Fuel Catalyst is a concentrate that cleans heavily contaminated fuel systems and storage tanks. It dissolves tank sludge, stabilizes the fuel, restores Optimal Fuel Quality, and preserves the integrity of stored fuel up to 12 months.

AFC-705 should be added with each refueling, to enhance lubricity, eliminate carbon deposits, reduce harmful emissions, and lower fuel consumption.

AFC-805[®] = AFC-705[®] + Anti Gel = a winter additive to reduce the pour point and avoid fuel gelling.

	AFC-705	AFC-805
Contents	combustion catalyst surfactant dispersant corrosion inhibitor lubricity enhancer	combustion catalyst surfactant dispersant corrosion inhibitor lubricity enhancer anti gel
Treatment ratio	1 : 5000	1 : 2500
8 oz bottle	320 gallons	N/A
1 gallon jug	5,000 gallons	2,500 gallons
55 gallon drum	275,000 gallons	137,500 gallons

Optimal Fuel Quality for Peak Engine Performance.

Eliminates Tank Sludge

- Cleans fuel storage and delivery systems
- Stabilizes and restores fuel quality
- Dissolves and disperses sludge and slime
- Eliminates costly tank cleaning and disposal fees

Reduces Harmful Emissions

- CO – HC's – NOX – SOX – PM
VOC's – Carbonyls – PAH

Provides Peak Engine Performance

- Improves combustion
- Removes and prevents carbon build up
- Prevents corrosion and choking of injectors
- Lowers fuel consumption
- Adds lubricity to low sulfur fuel
- Extends equipment life

AFC-805 lowers the pour point

Use in Diesel, Gasoline, Kerosene, HFO, Hydraulic fluid, etc.

ALGAE-X[®] Total Fuel Management Systems
